History of Case 1707

An application from Prof Ray F. Smith (*University of California, Berkeley, California, U.S.A.*) for the conservation of the specific name of *Diabrotica undecimpunctata* Mannerheim, 1843 by the rejection of *Crioceris sexpunctata* Fabricius, 1792 was published in BZN 22: 246–247 (November 1965), together with support from six workers. No further action was taken at that time because the automatic rejection of *nomina oblita* such as *C. sexpunctata* was under review. A revised and expanded application, to include conservation of the subspecific name of *D. undecimpunctata howardi* Barber, 1947, was formulated by Dr P.K. Tubbs (*International Commission on Zoological Nomenclature, c/o The Natural History Museum, London, U.K.*) and published in BZN 48: 219–221 (September 1991). Notice of the case was sent to appropriate journals. It was noted on the voting paper that the case had the support of Dr Hans Silfverberg (*Universitetets Zoologiska Museum, Helsingfors, Finland*).
